

# PHANTOM CS™ SERIES SIDE-LOADING RETRACTOR SETS

CS-1600 & CS-1601

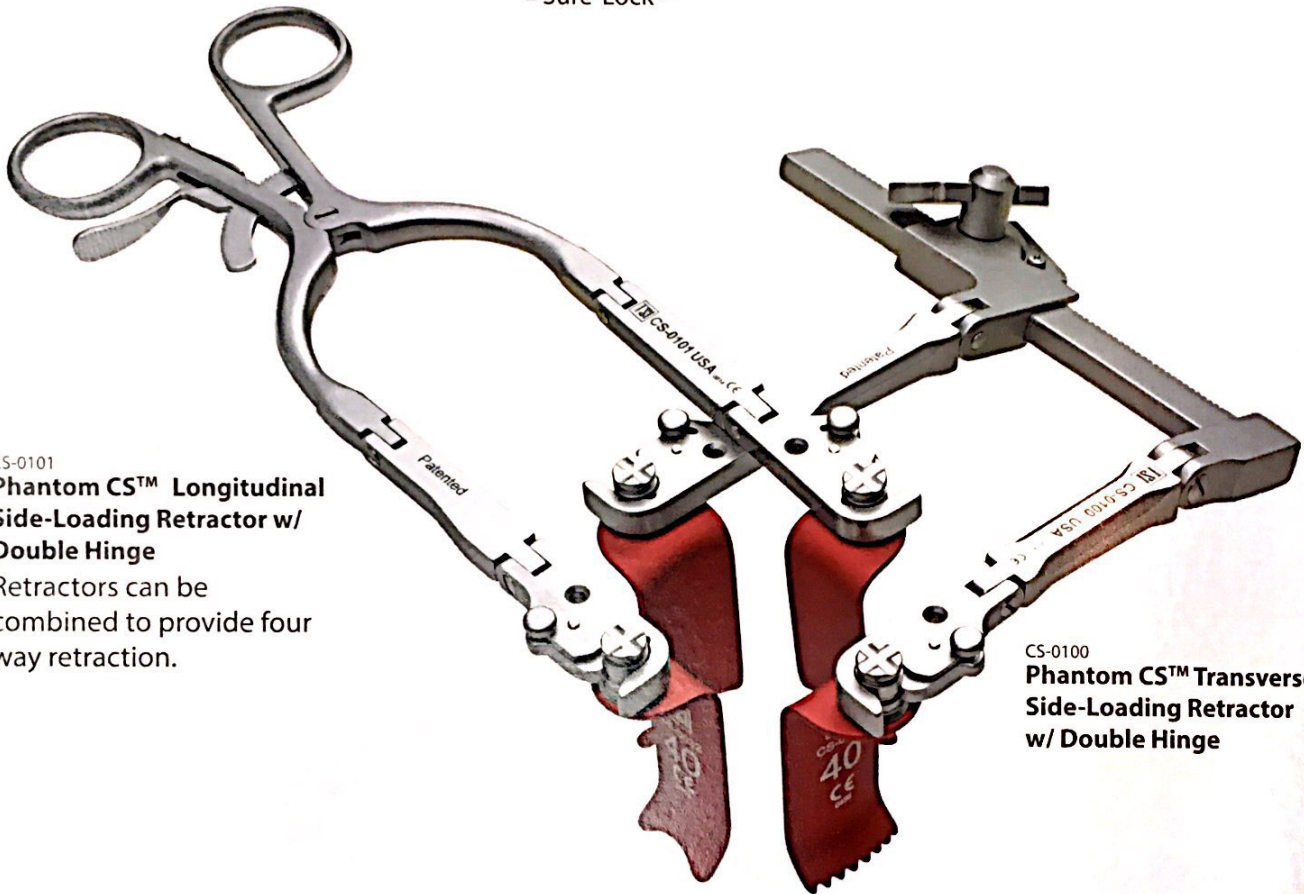

# PhantomCS™ CERVICAL SET

CS-1600 & CS-1601

## RETRACTORS

Side-Loading retractors provide an easy yet secure attachment space for blades. TSI's Sure-Lock™ technology ensures that blades are securely connected to the retractor body.

CS-0101  
**Phantom CS™ Longitudinal Side-Loading Retractor w/ Double Hinge**

Retractors can be combined to provide four way retraction.

CS-0100  
**Phantom CS™ Transverse Side-Loading Retractor w/ Double Hinge**

## RETRACTOR BLADE HANDLES

Retractor blade handles facilitate a quick connection to the retractor bodies. The blade handles may be used as a hand held tissue and muscle retractor with any blade. Cross cut connector helps prevent blade rotation while in the handle. Once blades are locked into the retractor body, twist the blade handle counter clockwise and slide forward to disengage.

CS-0105  
**Phantom CS™ Side-Loading Retractor Handle**

## TWIST DRILL & DRILL GUIDES

Drill guides penetrate cortical bone and the twist drill fits down the drill guide tube. Using the drill guide to fixate the distraction screws provides parallel placement between the vertebral bodies and increases the stability of the distractor body.

# EXPERIENCE THE DIFFERENCE. EXPERIENCE INNOVATION.

Phantom CS™ Side-Loading Retractor System provides exposure for ACDF procedures. Patented Sure-Lock™ technology ensure that the retractor blades are securely attached. Multiple blades options accommodate diverse patient anatomies.

## RETRACTOR & PADDLE BLADES

A wide variety of cervical retractor blades are radiolucent and ideal for procedures using fluoroscopy. TSI's unique paddle blades fit directly onto the distractor arms to provide maximum exposure with minimal wound opening.

CS-0030 - CS-0095  
Phantom CS™  
Retractor Blades

-Available in blunt, short tooth, long tooth, micro blunt and micro short tooth

CS-0040 & CS-0115  
Phantom CS™ Paddle  
Blades and ACF  
Distractor
